## SERVICE MENU

### Behavior Consultation \$400

This is the first step in any CRCCS training program. An approximately 3 hour session with our Certified Trainer & Behavior Consultant to introduce yourself, your dog, and their challenges. You'll walk away with a lot of information and a plan of approach on how to begin changing behavior at home right away. Then together we'll develop a personalized training plan.

### Formal Dog Assessments \$350

This professional, hands-on behavior assessment and evaluation is a 1.5-hour session with your dog and a 1.5-hour consultation with you to discuss results and provide a demo if needed. After learning what is driving your dog's behavior, we provide proper guidance, education, and discuss options moving forward. Perfect for dogs with whom other methods have failed; rescue groups or shelters needing behavior evaluations; court cases; landlords; or those looking to start training again but are unsure where to begin.

### One on One Sessions \$150

90 minute hands-on coaching session out on the trails, in a real world setting with you, your dog, our Behaviorist and an assistant. Geared toward honing your handling skill set.

### In-Home Behavior Consultation Starting at \$500

Approximately 3 hour Behavior Consultation in the comfort of your own home where we can identify and discuss specific areas in your environment in relation to behavior. Case by case, please inquire.

### In-Home Training Session \$250

90-minute working session at owners home (for current customers).

### Daycamp - \$35

Includes 30 minute training sessions that focus on improving recall, loose leash walking, foundation training, confidence building, and positive, structured socialization with other dogs. Daycamp will also address basic behavior challenges such as minor reactivity, jumping, inappropriate manners, and more.

### Intensive Training - \$100

Our Intensive Training sessions are reserved for canines working to overcome more serious behavior challenges. These two 45-minute sessions are more intense and target specific behaviors such as insecurity, fear, reactivity, resource guarding and more.
